💼 PROFESSIONAL EXPERIENCE

"Final year B.Tech Computer Science student at KL University with an interest in Web development . Ability to work independently and as part of a team and also can lead a team efficiently.

🧠 SKILLS

Programming
Python
C programing
Web-development

Soft Skills
Problem Solving
Communication
Team Collaboration

WEB
HTML, CSS, JS

📁 PROJECTS

Health Care Management System
Developed a web-based Health Care Management System to efficiently manage patients, doctors, and staff with features like scheduling and record management. Designed an intuitive and responsive user interface for seamless navigation across patient registration, doctor appointments, and staff coordination. Implemented doctor scheduling and appointment management, along with modules for non-technical staff task management. Built using CodeReady Studio and MySQL, the system also integrates Stripe for secure online payments using dump cards.

Password-Generator
Developed a secure password generator that creates strong, random passwords with customizable length, complexity, and character options. Designed a clean and user-friendly interface using CSS, while JavaScript powers dynamic password generation and real-time display.

🗝 CERTIFICATES

- AWS Certified Cloud Practitioner ↗
